

## Catlow® CAM TWIST™ MAGNETIC In-Line Breakaway

Catlow's CAM TWIST Magnetic In-Line Breakaway design is the future of breakaway technology.

The CAM TWIST gives you the assurance that your breakaway will perform when you need it most. There is no other breakaway that gives you the option of preventative testing while installed. With a twist the breakaway can be taken apart and inspected for damage, corrosion, and wear without removing the breakaway from service. There will no longer be the need to have a 'remove by' date on your breakaway.

The CAM TWIST is designed to be installed between the fuel dispenser and the nozzle. To inspect the unit, two wrenches applied to opposite ends of the breakaway with a twisting motion mechanically separates the unit. The unique design seals the internal components before separation is complete, thus reducing any exposure to product. With the CAM TWIST Magnetic 'snap-back technology', alignment and reconnection is easy. After inspection, align the two halves together, and let the magnets do the work while pushing the unit back together. It's that easy!

### Features:

- Inspectable, no 'remove by' date
- Magnetic Snap-back Technology
- Lightweight
- UL/ULC Listed
- Carb Certified
- Meets NFPA 30A Codes
- BSPP and BSPT threads available upon request

### Benefits:

- No repair kit needed
- Maximum separation force is less than 300 lbs.
- Durable plastic cover prevents damage to the breakaway during a drive off
- Minimal flow restriction
- Seals both ends of the breakaway
- Easily maintained in the field
- One year warranty

### Ordering Specifications:

- CTM75 3/4" NPT Magnetic Breakaway
- CTM100 1" NPT Magnetic Breakaway
- CTMVA Vac Assist Magnetic Breakaway (M34 x 1.5 Thread)

### Accessories:

- A13 8" Whip Hose for Model CTM75
- B9 12" Whip Hose for Model CTM100
- VI012-1 12" Whip Hose for Model CTMVA

### Materials:

- Body is Aluminum
- O-ring and seals are Viton
- Breakaway cover is Nylon
