

Introducing DuraMax™ Sheathing for Encore® S and Encore 300 dispensers

DuraMax sheathing is our new standard offering on all Encore dispensers, replacing stainless steel.

DuraMax is a silver fluorocarbon coating applied to galvanized sheathing. Fluorocarbon coatings are a proven technology used in the automobile industry and in architectural applications for more than 25 years.

Trim moldings and other external applications of the Cadillac® Deville®, the Lincoln® Navigator® and the Daimler Chrysler® 300M all use fluorocarbon coatings.

Architectural applications include railings, trim, fascia and curtain walls of buildings.

Benefits include:

- Resists dirt pick up
- Exceptional corrosion resistance
- Easily maintained finish

Warranty:

Best in industry, 4 year corrosion warranty applies

Timing:

All orders placed as of September 4, 2007 will have DuraMax sheathing unless otherwise specified.
